

MINECRAFT CLUB

We are excited to offer a **Minecraft Club** for students in **Years 3-6!** Minecraft is a popular educational game that allows students to build, explore, and collaborate in a virtual world. It encourages creativity, problem-solving, and teamwork. The students will be using laptops.

In **Minecraft Club**, students will use **Creative Mode only**, which allows them to build freely without survival challenges or battles. This ensures a safe, fun, and constructive environment where students can express their creativity and develop digital skills.

Minecraft Club will be held on Fridays at lunchtime. The DET has purchased a licence for Minecraft Education and is therefore free for the students to use.

The design brief is to create a town on the sides of a river. The specifics will be explained later to them.

If you would like your child to participate in **Minecraft Club**, please complete and return the permission slip below to Mr Kubala.
